CHANNEL & CLAIM GAP

PLATFORM	SPEND	PLATFORM-CLAIMED	STORE-RECORDED	CLAIM GAP
Google Ads	USD 3,653.32	107.31	40	62.7%
Meta	USD 4,291.90	195	124	36.4%

The claim gap is a measurement difference, not a correction: platforms count conversions their own way. Decisions use store-recorded orders.

WHAT CHANGED

Blended CAC	USD 58.42	+USD 1.38	no base
Orders	234.00	+3.00	no base

FINDINGS

Payback broken Whole account OPPORTUNITY TO RECOVER

USD 558.96 at stake

First-order acquisition is underwater: blended CAC \$58.42 exceeds first-order contribution \$54.31, a \$558.96 gap across 103 new customers. Blended MER is healthy at 2.82, so repeat purchases are covering it — but new-customer economics rely on the second order. What to do: lift first-order AOV (bundle or free-shipping threshold) or trim the weakest prospecting spend. Next month we check blended CAC against first-order contribution again.

Spend headroom Whole account GROWTH OPPORTUNITY

+USD 4,508.01 opportunity

Blended MER is running at 2.82 against a break-even of 1.80 on USD 7,945.22 of ad spend — comfortably profitable. This is month 2. At today's efficiency there is roughly USD 4,508.01 of additional monthly spend that would still clear break-even. Efficiency falls as spend rises, so treat this as a ceiling, not a target. Test a bounded increase — not the full figure — on the strongest campaigns for a defined period, and hold if efficiency slips. Next month we check MER against break-even and total orders to see whether the added spend paid.

Claim gap Google Ads MEASUREMENT NOTE

no money at stake

Google Ads claims 107.31 conversions against 40 store-recorded orders — a 62.7% gap, beyond the 61.7% tolerance. This is month 2. This is a measurement risk, not a spend loss: treat the platform's own conversion count with caution. No spend action. Rely on store-recorded orders for decisions and note the divergence in the report. Next month we check the platform-to-store claim gap.

WHAT WE CHECK NEXT MONTH

- blended CAC against first-order contribution
- blended MER against break-even

How last month's checks turned out

RECOMMENDATION	RESULT	STATUS
Payback broken · Whole account	blended_cac USD 57.04 → USD 58.42	worsened
Claim gap · Google Ads	claim_gap 64.4% → 62.7%	improving
Spend headroom · Whole account	mer 2.50 → 2.82	improving
